S.N. MOURYA

Java Full Stack Developer | Spring Boot, Microservices, React.js & AI Integration • Bengaluru, India (Open to Relocate)

Phone: +91 8688610728 | Email: s.n.mourya2005@gmail.com | GitHub | LinkedIn | LeetCode | Portfolio

PROFILE

Versatile Java Full Stack Developer (B.Tech in CSE – AI & ML, 2022–2026, ALTS, Anantapur; CGPA: 7.57, First Class with Distinction) with hands-on expertise building enterprise full-stack web applications and microservices using **Java, Spring Boot, React.js, and SQL**, alongside modern **Generative AI / LLM integration (Spring AI, OpenAI & Gemini APIs)**. Strong grasp of Core Java (OOP, Collections Framework, Multithreading, Streams API) with practical skills in REST API architecture, Hibernate/JPA, and secure JWT authorization. Strong foundation in Data Structures & Algorithms on LeetCode, combined with 8 months of software development internship experience from JSpiders Bengaluru, with a proven track record of shipping production-grade full-stack and AI-augmented applications.

TECHNICAL SKILLS

Core Java & OOP: Java (Core Java, OOP Principles: Inheritance, Polymorphism, Abstraction, Encapsulation), Collections Framework, Multithreading, Concurrency, Exception Handling, Java 8 Streams, Generics

Backend & Microservices: Spring Boot, Spring MVC, RESTful APIs, Microservices Architecture, Hibernate ORM, Spring Data JPA, Spring Security, JWT (JSON Web Tokens), OpenAPI 3.1 / Swagger, Postman

AI & LLM Integration (Java): Spring AI, OpenAI & Gemini API Integration, Prompt Engineering (ExcelR Certified), RAG Architecture, Vector Embeddings, Multi-Provider AI Abstraction, JSON/POJO Structured Output Parsing, Deterministic Fallbacks

Frontend & UI Development: React.js, JavaScript (ES6+), HTML5, CSS3, Responsive Design, Axios, Client-Server Data Binding, Webhooks, CORS Configuration

Databases & Storage: MySQL, PostgreSQL, Oracle SQL, Relational Schema Normalization, Complex SQL Queries, ACID Transactions, MongoDB

Cloud, DevOps & Testing: Docker Containerization, Microsoft Azure Cloud Basics, Git, GitHub, Maven, JUnit 5, Mockito, Agile/Scrum Methodologies

PROJECTS (ENTERPRISE FULL STACK & AI-INTEGRATED SYSTEMS)

AI Health Triage & Symptom Assessment Platform | AH Live Demo

Technologies: Spring Boot, React.js, Spring AI / LLM APIs (OpenAI, Gemini), Java Rule Engine, OpenAPI 3.1, Docker, Spring Security, JWT

- Architected an enterprise-grade AI health triage platform integrating **Spring AI with OpenAI & Gemini APIs** for natural language symptom extraction and multi-provider AI abstraction.
- Implemented a high-precision **deterministic Java Rule Engine** that validates LLM responses, eliminates clinical hallucinations, and classifies triage urgency (Emergency Red Flag, Urgent, Self-Care).
- Engineered a **100% offline fallback circuit breaker in Java** with Jakarta `@Valid` request validation and interactive OpenAPI 3.1 Swagger documentation, ensuring zero downtime during API timeouts.
- Developed a responsive React.js UI with dynamic triage cards, structured home care guidance, and specialist referral routing; containerized the multi-tier application using Docker.

Courier Logistics & Shipment Tracking System | CL Live Demo

Technologies: Spring Boot, React.js, MySQL, Hibernate/JPA, RESTful APIs, Axios, Docker, Git, JUnit 5

- Developed a full-stack logistics platform featuring dynamic shipping rate calculations, multi-step consignment booking wizard, and client CRM management.
- Implemented **40+ secure RESTful APIs in Spring Boot** managing consignments, warehouse transit hubs, delivery fleet assignment, and automated billing settlements.
- Built real-time package tracking UI in React.js with interactive visual milestone steppers and printable consignment waybills.
- Designed normalized MySQL relational schema using Spring Data JPA with entity relationships for packages, tracking history waypoints, and delivery agents.

INTERNSHIP EXPERIENCE

Full Stack Developer Intern — JSpiders — **BTM Bengaluru | January 2026 – August 2026**

- Developed full-stack web applications using **React.js and Spring Boot** as part of a collaborative Agile development team.
- Constructed, documented, and validated **90+ REST APIs using Postman**; connected backend endpoints with frontend components end-to-end.
- Resolved CORS configuration errors, API connectivity bottlenecks, and managed SQL database transactions to support core application workflows.
- Participated in sprint reviews and code refactoring; utilized Git for collaborative version control and authored unit tests using JUnit 5.

EDUCATION

B.Tech in Computer Science Engineering (AI & ML) — ALTS, Anantapur — **2022 – 2026 | CGPA: 7.57 (First Class with Distinction, 0 Active Backlogs)**

PROBLEM SOLVING & DATA STRUCTURES RIGOR

Algorithmic Problem Solving on LeetCode: Proficient in Arrays, Strings, Linked Lists, Stacks, Queues, Hashing, HashMaps, Sets, Searching, Sorting, Two Pointers, Trees, Graphs, and Recursion. Strong focus on analyzing time and space complexity tradeoffs (Big-O analysis) and writing robust, edge-case-tested code.

CERTIFICATIONS & ACHIEVEMENTS

- **Java Full Stack Development Certification** — Udemy / JSpiders
- **AI-ML Virtual Internship** — EduSkills Academy
- **Prompt Engineering Certification** — ExcelR
- **Participant, Smart India Hackathon** — Rapid Prototyping
